The Adjustable stirrup head is used at the top of the standard to provide an additional maximum adjustment of 300 mm.

Available in sizes:

- U size 100*100*50 length 350mm
- U size 100*100*50 length 450mm
- U size 100*100*50 length 550mm to 600 mm

PRODUCTS

Scaffolding

A temporary structure on the outside of a building, made of wooden planks and metal poles, used by workmen while building, repairing, or cleaning the building. Consisting of advantages of being portable, highly accurate, easily handled, easily installed and has high load bearing capacity.

ISMC Channels

Indian Standard Medium Channel (ISMC) are used to hold the building in construction. ISMC channels are made sturdy and heavy to uplift the construction site so that it won't collapse. The company manufactures apex quality of channels in the industry.

MS Chali

MS Chali is used as a scaffolding platform. It is used for outer walls like plaster, glass fitting, cleaning etc. MS Chali has standardized size of 18 Inch x 2 metre.

Cuplock Ledgers/Horizontals

These ledgers have forged blade ends which fit in the cup joint on the standard. They can be used in variety of ledger size combinations to suit required bay size & loading conditions. Length or width of the ledgers is measured between center to center of two verticals.

Features:

- Simple Robust Design
- Low Maintenance

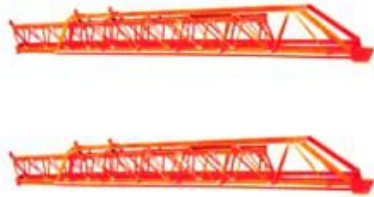

Cuplock Standard/Verticals

Cuplock standard have cup joints welded at every 500mm intervals, thus offering levels for working & also for bracing the standards while using in the slab support when loaded fix. Verticals are made of 40 NB medium/heavy class pipes and drilled to fix spigot joints.

Features:

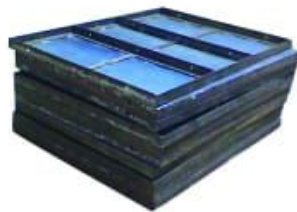

- Galvanized Scaffolding
- Powder Coated Scaffolding
- Dip Paint Scaffolding

Acro Span

Acro Spans are ideal to be used as self – supporting runner in shuttering systems. Furthermore, Adjustable Beam spans are installed under shuttering plates or floor from panels.

Acro span have a standardized size of 2.5 x 2.5 metre (2350 x 2350 mm)

MS Plate/Centering/Steel Plate

Shuttering plate is made of high quality 3mm sheet with 35x5 mm steel angle. It is a water tight shuttering which can bear the load of cement concrete placed on it. It can be used for horizontal, vertical or any other shape required for the work. Its leveled surface gives a good appearance. If the plaster is required, the thickness of plaster will be less.

Advantages:

- Stronger, durable and better longevity than timber framework and can be used multiple times
- Do not absorb moisture from concrete
- Do not shrink or warp

Clamp Fix

Our competent experts put their efforts to make the Pressed Swivel Couplers very effective compared to other swivel couplers supplied by our rivals. For its wonderful design it gives supreme performance. Superb engineering, operational efficiency, durability and excellent quality are the important features that we are concentrating upon to serve our clients with

Clamp Swing

Our competent experts put their efforts to make the Pressed Swivel Couplers very effective compared to other swivel couplers supplied by our rivals. For its wonderful design it gives supreme performance. Superb engineering, operational efficiency, durability and excellent quality are the important features that we are concentrating upon to serve our clients with

Tele Prop

Tele Prop is a labor and time saving device to support shuttering and centering. It is made out of 60mm O.D. & 48mm O.D. tubes moving in each other telescopically. A heavy duty 5.G. iron nut provides fine adjustment of height of prop. Top and bottom plates are provided with nail holes for wooden runner and holes for bolting. While after using props one above other. It is essential to have bracing in two directions just above outer tube for freight beyond 3500mm. Use of props by double staging is recommended up to 7000 mm height only. The threads are rolled and not cut threads.

Available in sizes:

- Prop 2*2 metre
- Prop 2*3 metre
- Prop 3*3 metre

Joint Pin

We are offering various Joint Pins or Spigot Supply which are engineered specifically in order to attain utmost dimensional accuracy. Our suppliers are authentic and the finishing of these pins are really magnificent. Our dimensionally perfect joint pins are designed for end to end (axial) association when the tubes are in compression by our eminent engineers. These pins are highly demanded for its performance and accuracy.
